CLEAN UP

- Portable
- Efficient
- Versatile

The **3510 AGRI-VAC**, equipped with a WALINGA #510 SRT blower, can move up to 10 tonnes/hr, and can be used in confined areas to perform transfer, clean-up or loading operations. The 3510 moves grain on a cushion of air which maintains grain and seed quality.

Petrol, diesel and electric models are mounted on a formed steel, three wheeled cart, with fork-lift pockets making it very simple to move in to the smallest corner of your storage area. Also available with a 3 point hitch and PTO drive, it is the ideal unit for someone who needs a versatile and portable grain handling unit.
